Merchant URL ID

Reliable Website URL Identification for Your Portfolio

Payment facilitators, ISOs, and acquirers supporting card-not-present (CNP) payments without merchant URL data are missing crucial risk indicators and therefore are vulnerable to abuse. LegitScript identifies your merchants' website URLs to enrich your datasets, reduce your risk exposure, and optimize the value of persistent merchant monitoring.

Benefits

Prevent Card Network Fines
Reduce regulatory scrutiny and card network fines by making more informed, proactive risk-management decisions.

Reduce Manual Effort
Eliminate existing manual URL identification processes to save your team valuable time and resources.

Increase Risk Intelligence
Augment your ecosystem visibility and gain a clearer understanding of your portfolio's risk profile.

Improve Data Integrity
Enrich your merchant data with accurate website URLs that have been reviewed by LegitScript's expert analysts.

Features

- **Seamless setup** that requires no additional steps on your end to get started. Simply submit the merchants for LegitScript Merchant Monitoring and we will identify the missing website URLs during our risk assessments.

- **Secure API and portal user interface** options give you the flexibility to submit your merchant data and receive the results in the way that is best for your workflow.

Why Choose LegitScript?

With deep merchant risk expertise and unmatched result accuracy, LegitScript is recommended by Visa, recognized as a Mastercard Merchant Monitoring Service Provider, and trusted globally by major payment facilitators, ISOs, and acquiring banks.
