Platform Risk Solutions

Fortify Trust & Safety and Enable Enforcement With Expert Risk Intelligence

Online platforms face growing pressure to detect and enforce against harmful third-party content, from misleading ads and prohibited products to illicit or abusive user-generated content. Relying solely on traditional detection tools and in-house expertise leaves dangerous gaps in your defenses that violative activity can slip through undetected, putting your users, brand reputation, and regulatory compliance at risk.

LegitScript Surfaces What Other Approaches Miss

We help search engines, marketplaces, and social platforms uncover high-risk ads, listings, and user-generated content (UGC) that violate policies or exploit policy and enforcement blind spots. LegitScript delivers expert-backed, enforcement-ready results tailored to your platform and goals, enabling faster action, clearer visibility, and more effective trust and safety operations.

- ✅ Reveal patterns and violative behavior that evade conventional detection methods.
- ✅ Act faster with detailed insights backed by deep domain and regulatory expertise.
- ✅ Strengthen platform integrity and reduce reputational risk.

Ad Monitoring	Product Monitoring	UGC Monitoring
For Search and Social Platforms	For Online Marketplaces	For Social Media Platforms
