Content Scan

Automate Website Reviews with Rapid AI Insights

Manual website reviews are one of the biggest bottlenecks in payments risk workflows. Risk teams spend an average of 20 minutes per merchant, combing through seemingly endless products and pages for content risk signals. Content Scan changes that. Powered by LegitScript's cutting-edge AI that's trained on data our risk experts continuously update and curate, Content Scan automatically crawls merchant websites and delivers actionable risk assessments in minutes, making review a breeze.

20 Minutes → Reduce Manual Review → **1 Minute**

Key Features

- Smart crawling targets up to 25 pages per site in real time.
- Violation detection flags prohibited content and BRAM/VIRP card network rule violations.
- Clear risk scoring labels findings and provides transparent rationale.
- Full-page screenshots provide downloadable evidence for defensible decisions.

Benefits

- ✔ Reduce manual website review time by upwards of 95%.
- ✔ Identify risk hiding deep within large online catalogs.
- ✔ Automate low-risk cases and focus your team on the edge cases.

Whether you need a standalone tool or a tightly integrated module, Content Scan seamlessly embeds within your existing workflows. Access it through our secure web application or connect via API to streamline risk reviews.
