

Enterprise Certification Referral Partner Overview for Payments Companies

Compliance-Proof Your High-Risk Healthcare Portfolio

Healthcare merchants operate in one of the most heavily scrutinized categories in payments. Every unlicensed pharmacy, unverified telemedicine provider, or noncompliant med spa in a portfolio carries real exposure: card brand fines, processing holds, and reputational risk. LegitScript Healthcare Merchant Certification gives payments companies a faster, more reliable way to onboard high-risk healthcare merchants, reduce card brand risk across the portfolio, and give merchants a clear, fast path to processing and advertising.

The Benefits of the Enterprise Referral Partnership

- **Onboard With Confidence:** Certification satisfies card brand requirements for MCC 5122 and MCC 5912 merchants and confirms jurisdictional compliance, so you can bring high-risk healthcare merchants into your portfolio quickly and confidently.
- **Reduce Portfolio Risk:** Standardize compliance across your entire book of healthcare merchants and gain portfolio-wide oversight that mitigates card brand risk.
- **Speed Merchants to Revenue:** Certification unlocks payment processing and advertising permissions together, so merchants can start generating revenue as soon as they're certified. Enterprise partners get merchants to market up to 40% faster than the self sign-up path.
- **Strengthen Retention:** A fast, well-supported path to certification is a service merchants remember. Helping them get online, and stay online, strengthens the relationships that drive portfolio retention and growth.

The Foundation

Every enterprise partner is backed by LegitScript's nine certification standards:

- | | |
|---------------------------------------|---------------------------------------|
| ■ Licensure and Registration | ■ Privacy and HIPAA Compliance |
| ■ Legal Compliance | ■ Prescription Validity |
| ■ Prior History and Discipline | ■ Transparency and Accuracy |
| ■ Affiliates and Partners | ■ Compliant Advertising |
| ■ Patient Services Disclosure | |

"Corepay is firmly embedded in the healthcare industry, both in compliance and with our embedded tech stack. This LegitScript partnership ultimately ensures a minimum standard of merchant profile, enhances portfolio stability and creates better outcomes for all parties involved."

Sales Officer (CSO),
Corepay**

How the Enterprise Referral Partnership Works

- 1. Partner With Us:** Establish your Enterprise Referral Partnership and choose a certification code volume that matches your healthcare portfolio. Partnerships typically start at 20 codes; if your portfolio is smaller, we're always open to a conversation.
- 2. Refer Your Merchants:** Direct your healthcare merchants into a streamlined certification process. Your partnership tier determines how quickly their applications are picked up for review.
- 3. Get Them Online, and Keep Them Online:** Certified merchants meet card brand requirements and unlock advertising permissions, so they're ready to start generating revenue from day one. Portfolio-wide oversight helps them stay compliant over time.

Speed-to-Market by Partnership Tier

- **Expedited Processing:** For partners purchasing 40 or more certification codes, merchant applications are picked up for review within 2 business days.
- **Priority Processing:** For partners purchasing fewer than 40 certification codes, merchant applications are picked up for review in 10 business days or fewer.

Once a complete application is submitted, certification moves quickly. On average, 70% to 80% of applicants are certified in under 4 weeks, and 50% are certified in 2 weeks or less. Compared to the standard self sign-up path, the Enterprise Referral Partnership gets merchants to market up to 40% faster.

What Types of Merchants Qualify?

If a portfolio includes merchants in regulated healthcare categories, they are likely candidates for LegitScript Healthcare Merchant Certification. Commonly certified merchant types include:

- Online pharmacies
- Telemedicine providers
- Med spas and weight loss clinics
- Prescription eyewear merchants
- Veterinary healthcare providers
- Behavioral health companies
- Women's and men's health clinics
